

## 100-Liter Portable Medical FridgeFreeze

The 100-Liter unit is our largest portable medical refrigerator/freezer. Like our other fridges, it can operate on 12/24-volt DC and 110/240-volt AC. With the included 12-volt DC power adapter, the 100-Liter FridgeFreeze can even operate when plugged into a vehicle's 12-volt power outlet. This powerful and highly efficient FridgeFreeze unit includes an internal fan to prevent thermal layering and will keep a consistent temperature throughout. It also comes equipped with dual compressors for quick temperature pull-down.

The built-in digital thermostat provides precise temperature control and features a programmable temperature alarm. The 100-Liter FridgeFreeze comes with two lockable latches and heavy duty handles.

Volume	Vaccine Storage Capacity	Outside Dimensions	Inside Dimensions	Inside Volume	Weight	Product Code
	(Std. Vile Pack) 1" X 1" X 2.75"	LxWxH	LxWxH	Qts./Gal./Cu.Ft.	Pounds	
100-Liter	880	35" 19" 33"	19" 13" 26"	105/ 26/ 3.5	124	FFO

### UPS Battery Backup Capacity/ Run Times

UPS Battery Backup	Run Time
100 Liter Refrigerator	72-96 Hrs
100 Liter Freezer	28-40 Hrs

### Performance Characteristics

Temperature Parameters	Refrigerator	Freezer
Factory Settings	3°C to 7°C (37°F to 44°F)	-20°C to -16°C (-4°F to -3°F)
Lowest Temperature	-12°C (10°F)	-20°C (-4°F)
Highest Ambient Temperature Operating Range	49°C (120°F)	29°C (85°F)
