

Specification Sheet

20-Liter Portable Medical FridgeFreeze

The 20-Liter, like our other units, is made with portability in mind. It operates on 12/24-volt DC and 110/220-volt AC power sources. A 12-volt DC power cord is included which can be plugged into a vehicle's 12-volt power outlet. A great, compact fridge, that will last for years and that can be used to store vaccines, blood and anything else that requires precise temperature control. Each unit is carefully manufactured and tested in our San Diego facility, under our strict quality control process, before shipping!

Volume	Inside Dimensions	Outside Dimensions	Weight
20 liters	11"x8"x14" 27cmx20cmx35cm	25"x13"x20" 63cmx33cmx50cm	46 lbs 20.87 kg
