

35-Liter Portable Medical FridgeFreeze

35 liters

The 35-Liter portable medical refrigerator/freezer can be powered by a normal wall outlet or by 12-volt battery power. Like our other fridges, 110/240-volt & 12/24-volt usage is standard. Popularly used as vaccine refrigerators, it features an internal fan, sturdy handles, lockable latch and a programmable digital thermostat. Very sturdy, our portable fridges stand the test of time and the 35-Liter is no exception. Made with the same high quality standards you have come to expect from FridgeFreeze Inc.
